Dan,

Attached is a clean copy and a track-changes redline copy. We are working on adding responses to the charge questions document. We will have that put together tomorrow COB. Just let us know if there is something else you need.

Great work Sailesh, Tony, Myles and John!

Hi Dan,

Do we need to provide responses to the charge questions or just update the summaries and the chapter?

Hi Sailesh,

That sounds good, if we can get it finalized, or enough so that I can pull the summaries for the endpoints we are listing, in 2 weeks (April 4th) that should work with the timeframe.

Thanks.
Dan

Hi Dan

I started working on it.. But Thursday and Friday does not look good.. so I am working to send this over to you by middle of next week at the earliest.

Sailesh

Subject: FW: Peer Review Diisononyl Phthalate (DINP) Hazard Assessment
Importance: High

Hi Sailesh,

Now that we have all the peer review comments in, once you have had a chance to look them over, I would appreciate having some idea of how long it will take to respond to the comments and revise the assessment. The timeframe for this action is very tight, I need to have the supplemental proposed rule ready for workgroup review by April 14th or sooner. The hazard

assessment can continue to be polished up a bit after that but I need final summaries of the effects we intend to base the listing on for the technical section of the proposed rule. Originally those effects were liver, kidney, and developmental toxicity. It seems that one reviewer would also support using the cancer data so we need a final determination on whether to at least propose using that endpoint as well.

Thanks.
Dan

Do you have all this with references in a single document for us to review

Hi Earl, Jason,

Cheryl Itkin notified me that you were both willing to peer review our hazard assessment for DINP, we appreciate you taking the time to do this. The hazard assessment is in support of our response to a petition to add DINP to section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) also known as the Toxics Release Inventory.

Ex. 5 Deliberative Process (DP)

We would like to get your comments back by March 22nd if at all possible as we are trying to meet a tight schedule for publication of a supplemental proposed rule in support of adding DINP to the EPCRA section 313 list.

If the above link does not give you access to the documents let me know.

Let me know if you have any questions.

Thanks.
Dan
